*Italy* Terry Kirk 2005-06-02  
“Modern Italy” may sound like an oxymoron. For Western civilization, Italian culture represents the classical past and the continuity of canonical tradition, while modernity is understood in contrary terms of rupture and rapid innovation. Charting the evolution of a culture renowned for its historical past into the 10 modern era challenges our understanding of both the resilience of tradition and the elasticity of modernity. We have a tendency when imagining Italy to look to a rather distant and definitely premodern setting. The ancient forum, medieval cloisters, baroque piazzas, and papal palaces constitute our ideal itinerary of Italian civilization. The Campo of Siena, Saint Peter’s, all of Venice and San Gimignano satisfy us with their seemingly unbroken panoramas onto historical moments untouched by time; but elsewhere modern intrusions alter and obstruct the view to the landscapes of our expectations. As seasonal

tourist or seasoned historian, we edit the encroachments time and change have wrought on our image of Italy. The learning of history is always a complex task, one that in the Italian environment is complicated by the changes wrought everywhere over the past 250 years. Culture on the peninsula continues to evolve with characteristic vibrancy. Italy is not a museum. To think of it as such—as a disorganized yet phenomenally rich museum unchanging in its exhibits—is to misunderstand the nature of the Italian cultural condition and the writing of history itself.

**Italy** Andrew Whittaker 2010 A fully illustrated primer on Italian culture goes beyond the parameters of travel and phrase books to inform readers on the nation's history, values and character, covering everything from regional identity and famous figures to Italian art and architecture. investigates the relationship between the ideas of nation and race among the nationalist intelligentsia of the Italian Risorgimento and argues that ideas of race played a considerable role in defining Italian national identity. The author argues that the racialization of the Italians dates back to the early Napoleonic age and that naturalistic racialism—or race-thinking based on the taxonomies of the natural history of man—emerged well before the traditionally presumed date of the late 1860s and the advent of positivist anthropology. The book draws upon a wide number of sources including the work of Vincenzo Cuoco, Giuseppe Micali, Adriano Balbi, Alessandro Manzoni, Giandomenico Romagnosi, Cesare Balbo, Vincenzo Gioberti, and Carlo Cattaneo. Themes explored include links to antiquity on the Italian peninsula, archaeology, and race-thinking.

### **Plants and Politics in Padua During the Age of**

### **Revolution, 1820-1848**

Ariane Dröscher 2021-11-17

This book highlights the close interactions between plants, plant knowledge, politics, and social life in Padua during the age of revolution. It explores the lives and thoughts of two brothers, the lawyer Andrea Meneghini (1806-1870) and the botanist Giuseppe Meneghini (1811-1889), illustrating the world of Padua's social and intellectual elite in the decades before the 1848 revolution. A closer look at park designs, gardening associations and networks, flower exhibitions, agricultural societies, organicist metaphors, and botanical research on the organization of living bodies opens up unexpected parallels between actors and ideas of two apparently distant areas: botany and political economy. It reveals unspoken dreams of progress and a new social order, but also sheds light on the ambiguous relationship between the Paduan elite and the Austrian rule.

Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.

in octavo was published “appresso Gioanne Calleoni” under the title “Discourse on the State of the Jews and in particular those dwelling in the illustrious city of Venice.” It was dedicated to the Doge of Venice and his counsellors, who are labelled “lovers of Truth.” The author of the book was a certain Simone (Simḥa) Luzzatto, a native of Venice, where he lived and died, serving as rabbi for over fifty years during the course of the seventeenth century.

Luzzatto’s political thesis is simple and, at the same time, temerarious, if not revolutionary: Venice can put an end to its political decline, he argues, by offering the Jews a monopoly on overseas commercial activity. This plan is highly recommendable because the Jews are “wellsuited for trade,” much more so than others (such as “foreigners,” for example). The rabbi opens his argument by recalling that trade and usury are the only occupations permitted to Jews. Within the confines of their historical

situation, the Venetian Jews became particularly skilled at trade with partners from the Eastern Mediterranean countries. Luzzatto’s argument is that this talent could be put at the service of the Venetian government in order to maintain – or, more accurately, recover – its political importance as an intermediary between East and West. He was the first to define the role of the Jews on the basis of their economic and social functions, disregarding the classic categorisation of Judaism’s alleged privileged religious status in world history.

Nonetheless, going beyond the socio-economic arguments of the book, it is essential to point out Luzzatto’s resort to sceptical strategies in order to plead in defence of the Venetian Jews. It is precisely his philosophical and political scepticism that makes Luzzatto’s texts so unique. This edition aims to grant access to his works and thought to English-speaking readers and scholars. By approaching his texts from this point of view,

**Blood on the Snow** Jan Bondeson 2014-01-31 The Swedish Prime Minister Olof Palme, a major figure in world politics and an ardent opponent of apartheid, was shot dead on the streets of Stockholm in February 1986. At the time of his death, Palme was deeply involved in Middle East diplomacy and was working under UN auspices to end the Iran-Iraq war. Across Scandinavia, Palme's killing had an impact similar to that of the Kennedy assassinations in the United States—and it ignited nearly as many conspiracy theories. Interest in the Palme slaying was most recently stirred by reports of the death of Christer Pettersson, who was tried for the murder twice, convicted the first time, and then

acquitted on appeal. In his investigative account of Palme's still-unsolved murder, the historian Jan Bondeson meticulously recreates the assassination and its aftermath. Like the best works of crime fiction, this book puts the victim and his death into social context. Bondeson's work, however, is noteworthy for its dispassionate treatment of police incompetence: the police did not answer a witness's phone call reporting the murder just 45 seconds after it occurred, and further time was lost as the police sought to confirm that someone had actually been shot. When the police arrived on the scene, they did not even recognize the victim as the Prime Minister. This early confusion was emblematic of the errors that were to follow. Bondeson demolishes the various conspiracy theories that have been devised to make sense of the killing, before suggesting a convincing explanation of his own. A brilliant piece of investigative journalism, *Blood on the Snow* includes an

Patriotic Pacifism Sandi E. Cooper 1991-12-19 Despite the liberalized reconfiguration of civil society and political practice in nineteenth-century Europe, the right to make foreign policy, devise alliances, wage war and negotiate peace remained essentially an executive prerogative. Citizen challenges to the exercise of this power grew slowly. Drawn from the educated middle classes, peace activists maintained that Europe was a single culture despite national animosities; that Europe needed rational inter-state relationships to avoid catastrophe; and that internationalism was the logical outgrowth of the nation-state, not its subversion. In this book, Cooper explores the arguments of these "patriotic pacifists" with emphasis on the remarkable international peace movement that grew between

1889 and 1914. While the first World War revealed the limitations and dilemmas of patriotic pacifism, the shape, if not substance, of many twentieth-century international institutions was prefigured in nineteenth-century continental pacifism.

the structure and function of the Sea's main ecosystems. The rise of the Mediterranean as the cradle of the Western Civilization leads to a discourse on the status of human interaction with the sea. Accelerating global climate change, water warming, ocean acidification and sea level rise, and analyses of their effects on key organisms, entire ecosystems and human socioeconomics are given. Forecasting and predictions are presented taking into account different future scenarios from the IPCC (International Panel on Climate Change). The volume is richly illustrated in color, with an extensive bibliography. A valuable addition to the limited literature in the field, offering up-to-date broad coverage merging science and humanities.

**Questions of Authority** Laura Olcelli 2019-12-10 Questions of Authority investigates Italian-Australian literary travel

exchanges throughout the long nineteenth century. The 1800s witnessed major transformations in Australian overseas travel: it gradually evolved from a replica of the Continental Grand Tour of the British, to a more idiosyncratic cosmopolitan experience, either touristic or professional. Moreover, it was during the second half of this century that both Italy and Australia underwent crucial political upheavals; these resulted in shifts from colonial and subjugated status, to self-government and ultimately independence. This volume connects these geographical, political and sociocultural contexts of Italy and Australia by considering their interlaced odeporic library, produced at a significant time in history. Additionally, this book analyses key texts compiled by Italians in Australia, and Australians in Italy: these chiefly consist of voyage accounts, but also include the records of explorers, missionaries, scientists and migrants coming from the Italian peninsula.

These primary sources include unpublished travel diaries compiled by the first Victorian women visitors to the Bel Paese, which have been largely neglected by scholarship thus far. This examination pinpoints the enduring significance of Italy in travel-related terms, showing how this destination was adapted from the map of eighteenth-century British Grand Tourists, to that of nineteenth-century Australian holiday makers. Most critically, Questions of Authority argues Italian-Australian peripatetic connections entail issues of authority, that emerge in the ways in which Italian and Australian travel writers displayed their authorship, cultural capital and national identification in relation to the other country. Finally, it demonstrates how these are highly regulated by, and yet simultaneously challenge, British colonial hegemony.

### **The World in Venice**

Bronwen Wilson 2005 *Positing a dynamic relationship between print culture and social experience*, Bronwen

Wilson's *The World in Venice* focuses on the printed image during a century of profound transformation. City views, costume illustrations, events, and portraits of locals and foreigners are brought together to show how printmakers responded to an expanding image of the world in Renaissance Venice, and how, in turn, prints influenced the ways in which individuals thought about themselves. Woodcuts and engravings of cities and inhabitants of Europe, and those of distant lands, initiated a sudden and pervasive experience with alterity that redefined the relations of Europeans to the world. By condensing the world into pictures, print enabled a radically novel and vicarious experience of others. Wilson explores the overlapping and evolving relations between space, vision, print, and identity, and engages with current scholarly debates concerning ethnicities, gender and geography, copies and originals, travel, nationhood, fashion, urban life.

aviation sector. This new culture is intended to protect front-line operators, in particular controllers and pilots, from legal action (except in the case of willful misconduct or gross negligence) by creating suitable laws, regulations and standards. In this regard, it is essential to have an environment in which all incidents are reported, moving away from fears of criminalization. The approach taken until now has been to seek out human errors and identify the individuals responsible. This punitive approach does not solve the problem because frequently the system itself is (also) at fault. Introducing the framework of a just culture could ensure balanced accountability for both individuals and complex organizations responsible for improving safety. Both aviation safety and justice administration would benefit from this carefully established equilibrium.

**McMafia** Misha Glenn

2009-01-19 Drugs, weapons, migrant labour, women — these are just a few of the many goods that effortlessly cross national borders in this globalized age, often without the knowledge or permission of the nations concerned. How is this remarkable criminal feat managed? From gun runners in the Ukraine, to money launderers in Dubai, cyber criminals in Brazil, racketeers in Japan, and the booming marijuana industry in western Canada, McMafia builds a breathtaking picture of a secret and bloody business. Internationally celebrated writer Misha Glenn crafts a fascinating, highly readable, and impressively well-researched account of the emergence of organized crime as a globalized phenomenon and shows how its secret and bloody business mirrors both the methods and the rewards of the legitimate world economy. Employing his journalistic talent and his prior experience covering organized crime in Eastern Europe, Glenn reports on this crime from

Women and the Mafia Giovanni Fiandaca 2007-09-04 The insightful essays in this book shine a new light on the roles of women within criminal networks, roles that in reality are often less traditional than researchers used to think. The book seeks to answer questions from a wide range of academic disciplines and traces the portrait of women tied to organized crime in Italy and around the world. The book offers up accounts of mafia women, and also tales of severe abuse and violence against women.

hardware to system applications and case studies, this book gives readers an in-depth understanding of the technologies and how they can be applied. I would highly recommend it to students or researchers who are interested in wireless sensing technologies and the associated applications." Dr. Benny Lo Lecturer, The Hamlyn Centre, Imperial College of London "This timely addition to the literature on sensors covers the broad complexity of sensing, sensor types, and the vast range of existing and emerging applications in a very clearly written and accessible manner. It is particularly good at capturing the exciting possibilities that will occur as sensor networks merge with cloud-based 'big data' analytics to provide a host of new applications that will impact directly on the individual in ways we cannot fully predict at present. It really brings this home through the use of carefully chosen case studies that bring the overwhelming

concept of 'big data' down to the personal level of individual life and health." Dermot Diamond Director, National Centre for Sensor Research, Principal Investigator, CLARITY Centre for Sensor Web Technologies, Dublin City University "Sensor Technologies: Healthcare, Wellness and Environmental Applications takes the reader on an end-to-end journey of sensor technologies, covering the fundamentals from an engineering perspective, introducing how the data gleaned can be both processed and visualized, in addition to offering exemplar case studies in a number of application domains. It is a must-read for those studying any undergraduate course that involves sensor technologies. It also provides a thorough foundation for those involved in the research and development of applied sensor systems. **History of the Grand Orient  
of Italy** Emanuela Locci

2019-08-26 The initiative to write this volume comes from the need to fill a bibliographic gap: no book in Masonic literature upon the history of Italian Freemasonry has been edited in English up to now. Thus, it aims to cover this lack and to enter those scholars referring to the English idiom into the history of the most eminent Obedience acting in Italy: the Grand Orient of Italy. The book consists of eight studies, written by young researchers devoted to this topic, and covers a span from the Eighteenth Century to the end of the WWII, tracing through an orderly temporal plot the story, the events and pursuits related to the Grand Orient of Italy.

**Republics and empires**

Melissa Dabakis 2021-08-17  
Republics and empires provides transnational perspectives on the significance of Italy to American art and visual culture

and the impact of the United States on Italian art and popular culture. Covering the period from the Risorgimento to the Cold War, it reveals the complexity of the visual discourses that bound two relatively new nations together. It also gives substantial attention to literary and critical texts that addressed the evolving cultural relationship between Italy and the United States. While American art history has tended to privilege French, British and German ties, these chapters highlight a rich body of contemporary research by Italian and American scholars that moves beyond a discussion of influence as a one-way directive towards a deeper understanding of cultural transactions that profoundly affected the artistic expression of both nations.

the past in the present, focusing on Abu Simbel in Egypt and other World Heritage sites. It explores and resolves a number of paradoxes: the past is impossible to preserve for eternity; all preservation implies change; preservation of one site normally means destruction of others; threats are important in the creation of heritage, but at the same time heritage may become a threat and threats can become heritage themselves; heritage stands in contrast to modernity and is at the same time part of it; both the increase and the decrease of modernity create heritage; and finally, heritage may be global and local at the same time. Heritopia will appeal to students and professionals in heritage studies and related subjects such as archaeology, history, ethnology and museology.

**Food for Thought** Simona Stano 2021-10-20 This volume offers new insights into food and culture. Food habits, preferences, and taboos are

partially regulated by ecological and material factors - in other words, all food systems are structured and given particular functioning mechanisms by specific societies and cultures, either according to totemic, sacrificial, hygienic-rationalist, aesthetic, or other symbolic logics. This provides much "food for thought". The famous expression has never been so appropriate: not only do cultures develop unique practices for the production, treatment and consumption of food, but such practices inevitably end up affecting food-related aspects and spheres that are generally perceived as objectively and materially defined. This book explores such dynamics drawing on various theoretical approaches and analytical methodologies, thus enhancing the cultural reflection on food and, at the same time, helping us see how the study of food itself can help us understand better what we call "culture". It will be of interest to anthropologists, philosophers,

warm-up, stretching, and resistance training exercises. For each exercise, accompanying photos and instructions guide readers in the correct execution and teaching of stretching and resistance training exercises. This section also includes a set of eight new dynamic stretching exercises. -Section 4 examines the design of strength training and conditioning programs. The information is divided into three parts: anaerobic exercise prescription (chapters 15 through 17), aerobic endurance exercise prescription (chapter 18), and periodization and rehabilitation (chapters 19 and 20). Step-by-step guidelines for designing resistance, plyometric, speed, agility, and aerobic endurance training programs are shared. Section 4 also includes detailed descriptions of how principles of program design and periodization can be applied to athletes of various sports and experience levels. Within the text, special sidebars illustrate how program design variables

can be applied to help athletes attain specific training goals. - Section 5 (chapters 21 and 22) addresses organization and administration concerns of the strength training and conditioning facility manager, including facility design, scheduling, policies and procedures, maintenance, and risk management. Chapter objectives, key points, key terms, and self-study questions provide a structure to help readers organize and conceptualize the information. Unique application sidebars demonstrate how scientific facts can be translated into principles that assist athletes in their strength training and conditioning goals. Essentials of Strength Training and Conditioning also offers new lecture preparation materials. A product specific Web site includes new student lab activities that instructors can assign to students. radiology are becoming increasingly relevant in the international medical and legal field as they offer essential techniques for determining cause of death and for anthropometric identification. This is highly topical in light of public safety and economic concerns arising as a result of mass migration and international tensions. The book discusses the latest technologies applied in the forensic field, in particular computed tomography and magnetic resonance, which are continuously being updated. Radiological techniques are fundamental in rapidly providing a full description of the damage inflicted to add to witness and medical testimonies, and forensic/radiological anthropology supplies valuable evidence in cases of violence and abuse. Written by international experts, it is of interest to students and residents in forensic medicine and radiology. It also presents a new approach to forensic investigation for lawyers and

police special corps as well as law enforcement agencies.

Times Continuing in her tradition of crafting thought-provoking, socially conscious dramas, Lynn Nottage's play tells the story of Mlima, an elephant struck down by poachers for his magnificent tusks. Beginning in a game park in Kenya, the play tracks the trajectory of Mlima's tusks through the ivory trade market while Mlima's ghost follows close behind—marking all those complicit in his barbaric death.

**Brandsapes** Anna Klingmann  
2010-09-24 Architecture as imprint, as brand, as the new media of transformation—of places, communities, corporations, and people. In the twenty-first century, we must learn to look at cities not as skylines but as brandscapes and at buildings not as objects but as advertisements and destinations. In the experience economy, experience itself has become the product: we're no longer consuming objects but sensations, even lifestyles. In the new environment of brandscapes, buildings are not about where we work and live

but who we imagine ourselves to be. In Brandscapes, Anna Klingmann looks critically at the controversial practice of branding by examining its benefits, and considering the damage it may do. Klingmann argues that architecture can use the concepts and methods of branding—not as a quick-and-easy selling tool for architects but as a strategic tool for economic and cultural transformation. Branding in architecture means the expression of identity, whether of an enterprise or a city; New York, Bilbao, and Shanghai have used architecture to enhance their images, generate economic growth, and elevate their positions in the global village. Klingmann looks at different kinds of brandscaping today, from Disneyland, Las Vegas, and Times Square—prototypes and case studies in branding—to Prada's superstar-architect-designed shopping epicenters and the banalities of Niketown. But beyond outlining the status quo, Klingmann also alerts us to the dangers of brandscapes.

By favoring the creation of signature buildings over more comprehensive urban interventions and by severing their identity from the complexity of the social fabric, Klingmann argues, today's brandscapes have, in many cases, resulted in a culture of the copy. As experiences become more and more commodified, and the global landscape progressively more homogenized, it falls to architects to infuse an ever more aseptic landscape with meaningful transformations. How can architects use branding as a means to differentiate places from the inside out—and not, as current development practices seem to

dictate, from the outside in? When architecture brings together ecology, economics, and social well-being to help people and places regain self-sufficiency, writes Klingmann, it can be a catalyst for cultural and economic transformation.
